

KETAKI KADAM

Senior Software Engineer | 8+ Years | Angular 19 · RxJS · Node.js · TypeScript

Phone: 8369816146 | Email: Kadamketaki25@gmail.com | LinkedIn: linkedin.com/in/ketaki-kadam | Location: Mumbai/Pune, India

PROFESSIONAL SUMMARY

Senior Software Engineer with 8+ years designing and delivering enterprise-grade web applications, with deep specialization in Angular (v2–v19) frontend architecture — Micro-Frontend (MFE), RxJS, TypeScript — complemented by Node.js/NestJS backend development and REST API design. Proven track record delivering scalable solutions for global clients including Citi Bank, AT&T, and Reliance Industries. Combines hands-on individual contribution with technical leadership: leading code reviews and mentoring engineering teams, driving technical solutioning and sprint planning, and enforcing quality through SonarQube gates and comprehensive unit testing (Jest/Jasmine) across the SDLC.

CORE SKILLS

- **Frontend:** Angular 2/5/8/14/16/18/19, TypeScript, JavaScript (ES6+), HTML5, CSS3, Bootstrap, RxJS, NgRx, Micro-Frontend (MFE), Module Federation, Webpack, PWA, Lazy Loading, Change Detection Strategies, Signals
- **Backend:** Node.js V22, NestJS, REST API Design & Integration, Microservices
- **Testing:** Jest, Jasmine, SonarQube quality gates, unit & integration testing, E2E testing
- **Databases:** MySQL (Stored Procedures), MongoDB, NoSQL
- **DevOps & Tools:** Azure Pipelines, Azure DevOps, Harness CI/CD, GitHub, SVN, Kubernetes, Docker, SonarQube, Autosys, JIRA
- **Leadership & Methodologies:** Agile/Scrum, SDLC, Technical Solutioning, Code Reviews, Mentoring & Team Coordination, Sprint Planning, Technical Documentation, Accessibility (WCAG)
- **Design Systems:** Citi Olympus Design System, Bootstrap, Responsive/Mobile-first Design

PROFESSIONAL EXPERIENCE

Photon Interactive | Sr. Software Engineer | Apr 2025 – Present

Client: Citi Bank — API Onboarding MFE, CitiDigital MFE, SLA Dashboard MFE | Banking Domain | Angular 18, RxJS, Jest

- Independently designed and integrated 3 Micro-Frontend (MFE) modules on Citi's globally deployed Olympus platform using Module Federation, enabling modular, scalable deployment across 5+ cross-functional teams.
- Implemented new platform features using latest RxJS operators and Angular 18 best practices, reducing PR review cycle time by ~25% through improved code maintainability.
- Wrote comprehensive Jest unit test suites achieving 85%+ code coverage; enforced SonarQube quality gates across all 3 MFEs before deployment via Harness CI/CD pipeline.
- Led code reviews and provided technical mentorship for a team of 6 engineers, ensuring adherence to Olympus design system standards and reducing post-release defects by ~30%.
- Coordinated end-to-end releases across dev, QA, UAT, and production environments; drove sprint planning and daily Scrum ceremonies across 2-week sprints.

Tech Mahindra | Sr. Software Engineer | Sep 2020 – Mar 2025

Client: AT&T — CNIO (Core Network Infrastructure Operations, ATLAS) | Telecom Domain | Angular 16, Node.js V20, NestJS, Jest

- Owned technical solutioning for 10+ feature requirements, authoring solution documents and presenting designs to a 10-member cross-domain team before each sprint, reducing ambiguity and rework by ~20%.
- Spearheaded migration of the Central Office (CO) team from legacy GCAS platform to the unified ATLAS platform, consolidating operations for 3 Digital Electronics Groups (DEG) and cutting deployment time by 40%.
- Built scalable Angular 16 features with RxJS; implemented lazy loading and change detection optimizations that improved initial load performance by ~35%.
- Designed and authored 8+ REST API microservice controllers in NestJS (Node.js) for frontend-backend integration, improving separation of concerns and enabling independent deployment of backend modules.
- Wrote Jest unit tests achieving 80%+ coverage for all new features; reviewed 100+ team PRs, providing technical mentorship and enforcing quality standards throughout the SDLC.

Client: Reliance Industries — Platform & BOC (Automation of Excel Sheet) | Oil & Gas Domain | Angular 8, Node.js, MySQL, Azure

- Developed a multi-application platform used by 50+ operations team members to manage crude and product trades, replacing error-prone manual Excel workflows and saving ~15 hours/week of manual effort.
- Built responsive Angular 8 UIs with HTML5, CSS3, and Bootstrap; integrated 5+ internal microservices via Angular HTTP client for real-time trade data updates.
- Designed and implemented Node.js REST API microservices with MySQL, including 10+ Stored Procedures for trade data management, reducing query execution time by ~20%.
- Configured and maintained Azure Pipelines for automated CI/CD deployments; coordinated source control and delivery for a team of 8 via Azure DevOps.

MindCraft | Frontend Developer Sep 2019 – Aug 2020

Client: RBL Bank — FinHsac, STP, Video KYC Login, PAN Validation | Banking Domain | Angular 5, jQuery, XML, JavaScript

- Delivered 4 production banking applications covering user approval workflows, product upgrades, video KYC onboarding login, and PAN validation, serving 10,000+ RBL Bank customers.
- Built dual-view (web and mobile) Angular 5 applications ensuring cross-browser compatibility and accessibility (WCAG) across Chrome, Firefox, Safari, and Edge.
- Integrated XML-format APIs and implemented OTP authentication flows, reducing onboarding drop-off rate by ~15% through streamlined secure customer flows.
- Conducted usability testing and applied diagnostics before each production release, achieving zero critical post-release bugs across all 4 applications.

Vernost Marketing Services | Software Engineer Jun 2017 – Jul 2019

Domains: Hospitality, Retail Affiliate, CRM, Airline | Angular 2, NativeScript, MySQL, jQuery, AWS S3

- Developed hotel and retail affiliate platforms (HAMSE, Shop Affiliate) surfacing real-time pricing from 10+ vendors; integrated Google Maps and push notifications, increasing user engagement by ~20%.
- Built VMS-CRM system managing customer relationships and transaction history for a loyalty marketing suite used across 3 business units.
- Delivered QE App — a NativeScript-based iOS quick-enrollment app for Jet Privilege frequent-flyer programme, onboarding 500+ users in the first 3 months post-launch.
- Managed deployments to AWS S3 and handled production bug fixes with <2-hour mean time to resolution (MTTR), maintaining 99.5% platform uptime.

EDUCATION

B.E. — Datta Meghe College of Engineering | 2016 | CGPA: 6.47 / 10.0

Diploma — St. Xavier's Technical Institute | 2013 | Percentage: 77%

SSC — Saraswati Vidyalaya | 2010 | Percentage: 92%

CERTIFICATIONS | AWARDS & RECOGNITION

- Certified Mid-level Angular Developer — Certificates.dev (AngularTraining.com)
- Pat on the Back Award, Tech Mahindra — Recognized for independently transitioning from a Frontend to a Full-Stack Developer role and delivering full-stack features end-to-end without supervision.
